CV numérique

19 rue Robert Lebelle, 60150 Thourotte

driver's license

Always passionate about creativity and games of logic, development is a perfect mix that I am not tired of since its discovery. Any type of language suits me because, being curious by nature, I count on learning a maximum in one way or another. I have a slight preference for Android development, artificial intelligence, and the web.
All languages and tools to master.
